

DOMANI USA

MANUFACTURER OF ARCHITECTURAL MATERIALS

Domani Radiance® and Domani Eco-Radiance® are patent-pending decorative translucent materials that can be applied to most substrates for the hospitality, commercial and retail industries. Our vibrant product line may be used for interior or exterior applications for architectural panels, partitions, doors, countertops (bar tops, vanity tops & furniture tops), point of purchase (POP) acrylic fabrication, visual merchandising and light diffusers.

Domani Radiance® is a fire resistant material which can be further enhanced for multitudes of commercial environments when incorporated with either glass or plastic substrates.

Domani Eco-Radiance® can help design professionals adapt their work toward ecologically sustainable ends. Our clients benefit from our expertise with advanced design solutions. Our products impart awareness of the long-term consequences associated with design and its impact on nature. Sustainable design offers a way to balance our impact of continued development and allows us to create safe objects of long-term value. Our clients realize that they can do well financially by first doing well environmentally.

The beauty of **Domani Radiance®** lies in our unique manufacturing process. First, our materials are extensively prepared to preserve them against deterioration. Then we monolithically laminate them without heat or crushing, preserving the image and appearance of even the most intricate photographs or graphic designs. Our material provides total UV protection while still maintaining the transparency and luminosity of the glass or plastic that it is laminated onto. Our eco-solvent and UV cured inks allow the color and texture of the image to never discolor, fade or craze. They are so easy to maintain that they can be cleaned with ordinary cleaners.

Features and benefits:

- May be laminated to recyclable plastics, acrylics or glass
- Easy to fabricate and install
- Low maintenance
- Light weight
- Thermo-Formable
- Sheet sizes up to 48" x 120"
- Gauge from 1/16" to 1"
- Custom designs available through **Domani Radiance® Design Team**
- Use of UV and Eco-Solvent inks for maximum curing
- Permanent application of image
- Fire resistant to ASTM E 84 code requirements for commercial use

Domani Radiance Specification Sheet

DOMANI RADIANCE & ECO-RADIANCE blend digital printing with creativity and practical design. By adding your designs to most substrates, Domani offers an ability to add a limitless combination of pure colors, compelling designs and interesting photographs to any project. Design professionals have the option of using a Domani Radiance graphic or creating their own. By utilizing a unique monolithic lamination technique, Domani provides a high-profile look to any application; i.e. light diffusers, wall dividers or partitions, bar tops, table tops, door inserts, and retail merchandising.
